

Cover Letter

Dear Hiring Manager

I'm writing to express my keen interest in your vacancy for a WEB Developer which was recently advertised on the jobs.bg website.

I'm familiar with VARCHIEV financial services good reputation in my hometown Varna. Moreover, as I'm living right next to VARCHIEV Foreign Exchange Office on Slivnica blvd. in Varna, I'm one of your happy clients.

As a WEB development enthusiast for many years I was always interested in innovative, beautiful and creative solutions in the process of reaching wider target of costumers in WEB environment. Back in 2006, when I made my first steps in WEB development and marketing I was happy to produce fluent and successful WEB market place for my family agriculture lands. In the last few years I'm focusing entirely on WEB and software development and I made my first steps in Java, Android SDK, C#/.NET as well. I was successful intern in Front End Development company in Varna, with 100% scores in JavaScript intermediate course and overall internship assessment.

Right now I'm studying intensively in the innovative Software University of Sofia, founded by Svetlin Nakov, achieving excellent results. I have made several HTML/CSS presentational projects, as well as JavaScript client side game using DOM animations and JS/JQuery functions. I've finished my first PHP/MySQL (LAMP) team project – hand made forum, using Bootstrap 3 framework for the Front End and a lot of hand made PHP code for the back end functions.

My primary OS is Linux Mint 17, as I have previous experience as a Linux Ubuntu technical support. I have licensed versions of WebStorm and PhpStorm (by JetBrains).

For me it would be a honor to be a part of and contribute to your company. Thank you for your time and I look forward to hearing from you in respect of an interview.

Yours sincerely

Atanas Dimitrov
